# I. Landscape of Oakland Schools

## A. District-wide Facts and Vision

**Mission:** Oakland Unified School District (OUSD) will build a Full-Service Community District focused on high academic achievement while serving the whole child, eliminating inequity, and providing each child with excellent teachers, every day.

**Vision:** All OUSD students will find joy in their academic experience while graduating with the skills to ensure they are caring, competent, fully informed, critical thinkers who are prepared for college, career, and community success.

The **Common Core Standards** ensure students are ready for success after high school by establishing guidelines for what every student should know in math and English language arts from K - 12th grade. The standards were drafted by experts and are designed to ensure students are prepared for today's entry-level careers, freshman-level college courses, and workforce training programs.

### SKILL DEVELOPMENT FOCUS

<b>Critical Thinking</b>	Purposeful, self-regulatory judgement. Reasoned consideration to evidence, context, conceptualizations, methods, and criteria
<b>Problem-Solving</b>	Defining a problem; determining the cause of the problem; identifying, prioritizing, and selecting alternatives for a solution; implementing a solution 1) Define the problem > 2) Generate new ideas > 3) Evaluate and select solutions > 4) Implementing and evaluation
<b>Analytical Skills</b>	The ability to examine something by separating it into parts and studying their relationships and influences

## C. Tips to Structure Engaging Sessions

### BEFORE YOUR TUTORING SESSION

#### Be Cautious of Your Setting and Attire

#### **Dress as if you are tutoring in the school setting:**

- Clothing should cover the entire midsection of your body and extend to at least the knees and shoulders.
- Clothing may not depict or display inappropriate or distracting language or images.

**Choose to tutor in a quiet space**, with background materials least likely to distract students.

Prepare to Respect the Session	Pings and alerts are distracting for tutor and student alike- <b>silence your notifications on your computer and/or cell</b> to limit distractions.
Have a Pen and Pad of Paper Close By	<b>Consider having writing materials nearby</b> to write notes/reminders to yourself, for ex: follow-up questions for your educator partner.
<b>DURING YOUR TUTORING SESSION</b>	
Present Clear Objectives	<b>Start sessions by sharing the agenda/plan for the session</b> , for example: You might let the student know that their teacher asked you to work on English Language Arts with them and that you will spend 15 minutes on guided reading practice and 20 minutes on a Brainpop writing activity of their choice.
Offer Choice	Lacking autonomy and being subjected to adultism can be a great point of frustration for students. Working with a tutor is a time that they can experience choice in their day. <b>If possible, allow your student to choose the order of activities and specific games/activities on apps.</b>
Model Norms for Engagement	<ul style="list-style-type: none"> <li>- Model appropriate behavior by sitting up or standing while tutoring.</li> <li>- Be aware of your posture and avoid answering emails or chats while working with students - if you seem bored, they will also become disengaged.</li> <li>- Demonstrate your undivided attention to your student and their work by keeping your eyes focussed on the student and not their surroundings.</li> </ul>
Promote a Culture of Curiosity	<p>Communication plays a key role in learning. <b>Ask open-ended questions if your partner student is having trouble getting focused or gets stuck:</b></p> <p><u>Questions to Ask at the Beginning of an Assignment:</u></p> <ol style="list-style-type: none"> <li>1. What do the directions say?</li> <li>2. What did your teacher tell you about this subject?</li> <li>3. What do you think you are supposed to do in this assignment?</li> </ol> <p><u>Questions to Ask if a Student Gets Stuck:</u></p> <ol style="list-style-type: none"> <li>4. What skills do you need to have to do this work?</li> <li>5. Which part of the assignment can you do?</li> <li>6. What skills do you need to be able to do?</li> <li>7. What is confusing to you?</li> <li>8. What do you think will happen if you try...?</li> <li>9. What strategies will you use to figure out the answer?</li> <li>10. What are the steps you need to take to find the answer?</li> <li>11. What will you do to check if your answer is correct?</li> </ol> <p><b>Instead of asking your student if they understand the concept, try asking them to “teach you” it in their own words.</b> This gives you the opportunity to listen to their point of view, evaluate their understanding, and if needed, reinforce concepts that the student might not have understood completely.</p>
Use Expressive Body Language	Use your body, facial expressions, hand gestures to act things out, highlight, convey interest, and reinforce key learning takeaways.
<b>AFTER YOUR TUTORING SESSIONS:</b> Upload your video and submit your report	

## V. Practice Scenario

### A. Elementary-Age Session Practice

TIMING	ACTIVITY	DESCRIPTION
5 minutes	<b>Relationship-Building Activity</b>	Ask the student: • What do you like to do on the weekends?
1 minute	<b>Agenda Review</b>	Explain that you're going to do Scratch Coding today and then review Google Classroom assignments from the Educator
5 minutes	<b>Try out Scratch</b>	Go to <a href="https://scratch.mit.edu/">https://scratch.mit.edu/</a> and click "Start Creating"

#### Google Classroom Check-In Assignment Support

**IMPORTANT REMINDERS:** Volunteers may NOT discipline students. Instead!

- Catch students doing a good job! Reward positive behavior with specific compliments as much as possible.
- Redirect a child's energy: "Look over here, I have something to tell you!"
- Use "I" statements to encourage students to cease behavior. "I cannot help you when..."
